STATE HIGHWAY DEPARTMENT SECTION

COLORADO DEPARTMENT OF HIGHWAYS

Governor—Stephen L. R. McNichals

State Highway Commission:

J. J. Marsh —District 1

Frank Ghent —District 2, Vice Chairmon

E. J. Barnes —District 3

Ray Wiebers —District 4

Robert W. Hendee—District 5, Chairmon

H. L. Bash —District 6

Ben H. Jorgensen—District 7

Peter Middlemist —District 8

Chief Engineer—Mork U. Wotrous

Prepared by the
PLANNING AND RESEARCH DIVISION

(Original Illustrations by Mapping and Special Studies Section)

FOREWORD

Colorado law requires the Department of Highways to compile and issue this annual report. The document provides information on the receipts and expenditures for highway purposes by the State and its several counties, cities and incorporated places, and has been issued annually since 1954.

The law requires that the report be sent to the Governor, to the members of the legislature and the elected officials of the counties, cities and towns. The report will also be made available to press and radio services and, so far as the published number will permit, to any interested citizen.

The Department of Highways, which is responsible for making this factual information available to the citizens of the State, hopes that the report will fulfill not only the statutory requirement, but that it will also serve to increase general understanding of the complex field of highway administration.

The method of presentation in this report has been adopted to produce an understandable documentation of highway facts. Also, the appendix shows detailed data for the use of highway administrators and interested highway user groups.

There are many other reports of the Department of Highways which are of interest to persons having a special interest in the highway development program. The Department welcomes inquiries relating to available publications.

THE DEPARTMENT OF HIGHWAYS AND ITS ORGANIZATION

The Department of Highways is a part of the executive branch of the State government, headed by the Governor. It has its own policy-making body which is the State Highway Commission. This Commission acts as a board of directors with full policy-making power. The best-known function of the Commission is the preparation each year of a budget which guides the work of the Department of Highways through the ensuing fiscal period.

The budget is recommended to the Governor by the Commission for his action and he has, under the law, the power to veto any item in the budget for any reason he deems to be appropriate.

In addition to this all-important function of budgeting, the Commission must approve all administrative policies and engineering standards used by the Department and must review on a quarterly basis the con-

struction progress, the fiscal position and all property transfers and sales. The Commission decides which highways shall be recommended for free-way status and decides which highways shall be a part of the State Highway System.

Under the policies established by the Commission, the Chief Engineer administers the affairs of the Department and is its chief administrative officer. The complex engineering and administrative groups, who man the Department of Highways, all work under the direction of the Chief Engineer. He alone is responsible for the direction of the work of the employees in accordance with the prevailing law.

Immediately below is a listing of the members of the State Highway Commission, the districts they represent and the counties comprising the districts:

Expiration Date of Term	Name	Address	District	Counties
Feb. 1, 1964	J. J. Marsh.....	850 Bannock Street, Denver, Colorado.....	1	The City and County of Denver
Feb. 1, 1964	Frank Ghent.....	c/o Ghent Motors, Ft. Collins, Colorado.....	2	Adams, Arapahoe, Boulder, Jefferson, Larimer, Weld
Feb. 1, 1963	E. J. Barnes.....	310 Chestnut, Sterling, Colorado.....	3	Cheyenne, Kit Carson, Lincoln, Logan, Morgan, Phillips, Sedgwick, Washington, Yuma
Feb. 1, 1963	Roy Wiebers.....	Sheridan Lake, Colorado.....	4	Baca, Bent, Crowley, Kiowa, Las Animas, Otero, Prowers
Feb. 1, 1962	Robert W. Hendee..	26 Elm Ave., Broadmoor, Colorado Springs, Colorado.....	5	Chaffee, Custer, Douglas, Elbert, El Paso, Fremont, Huerfano, Lake, Park, Pueblo, Teller
Feb. 1, 1962	H. L. Bash.....	c/o Bash Buick, Steamboat Springs, Colorado...	6	Clear Creek, Gilpin, Grand, Jackson, Moffat, Rio Blanco, Routt
Feb. 1, 1965	Ben H. Jorgensen..	Gunnison, Colorado.....	7	Delta, Eagle, Garfield, Gunnison, Mesa, Montrose, Ouray, Pitkin, Summit
Feb. 1, 1965	Peter Middlemist..	Antonito, Colorado.....	8	Alamosa, Archuleta, Conejos, Costilla, Dolores, Hinsdale, La Plata, Mineral, Montezuma, Rio Grande, Saguache, San Juan, San Miguel

THE STATE HIGHWAY SYSTEM

The Federal Aid Highway Systems and the State System of Highways are intimately tied together by the laws of the State. Chapter 120, of the Colorado Revised Statutes, 1953, as amended in 1957, describes the State Highway System in the following words: "The State Highway System shall consist of the Federal Aid Primary roads, the Federal Aid Secondary roads and the Interstate System, including extensions thereof within urban

areas, plus on amount not to exceed five percent of the mileage of such systems which may be declared to be State Highways by the State Highway Commission while not being any part of any Federal System." The actual mileage of highways classed according to their type of surface and number of lanes which existed on the various components of the State Highway System at the end of 1960, is shown in the following table:

MILEAGE TABLE FOR STATE HIGHWAY SYSTEM BY TYPE OF SURFACE AND NUMBER OF LANES

SYSTEM	Projected	Bladed	Graded and Drained	Gravel	Asphaltic			Port. Cement Concrete			Totals
					2 Lane	4 Lane	6 or More Lanes	2 Lane	4 Lane	6 or More Lanes	
Federal Aid Interstate	438	267	115	19	107	3	949
Federal Aid Primary	14	15	3174	199	11	114	26	3553
Federal Aid Secondary	19	49	808	3127	30	33	4066
State (No Federal Status) ...	14	3	1	56	65	3	6	148
Totals.....	485	3	50	879	6633	347	11	172	133	3	8716

Many inquiries are received which indicate that there is a general belief that the US route markers along a highway are an indication of its Federal Aid status. Actually nothing could be further from the truth. The US shield, with its number, is placed on a highway by the State only after approval by the American Association of State Highway Officials. This is a technical association of state highway officials which studies any request for a US numbered route and determines whether the proposed route is of a type which would entitle it to the numbered status. The real purpose of the route numbering system is to identify highways which, by reason of their general excellence, are the best routes of travel between distant points. They are a major aid to trans-State and trans-continental traffic.

From the tabulation shown in this section, it is noted that the Federal Aid System is made up of three distinct types of routes. The Interstate routes have been identified in the 1956 Federal Aid Act as "A Notional System of Interstate and Defense Highways." The Federal Aid Primary

routes cover a major portion of the other important trunk highways in the State. Federal Aid Secondary routes are feeder roads covering farm to market, mine to market and other similar community type service roads.

The map which is used as an illustration in this part of the report shows all those roads which are State Highways. The color legend overprinted on the road bonds indicates those sections of highway on which construction contracts were completed during calendar year 1960. Immediately ahead of the map is a tabulation which gives the detailed information regarding these completed contracts.

The 1956 Federal Aid Act places tremendous importance on the complete construction of the Interstate System. This system includes 41,000 miles of the most important highways in the nation. The engineering standards for it have been established and it is to be built in a manner which will make it capable of handling the traffic volumes that are estimated to exist in the year 1975. The standards are uniform for the

entire United States and have been accepted officially by all of the states and by the Secretary of Commerce on behalf of the Federal Government.

The funds appropriated to one of the Federal Aid Systems can be transferred to another Federal Aid System to only a limited extent. Generally speaking, in Colorado, the cost of constructing the Federal Aid Interstate System will be borne 90% from Federal appropriation and 10% from State source revenues. The Federal share approximates 55% and the State share 45% on the other Federal Aid Systems.

The Federal Highway Act of 1960 repealed the limitation with respect to the exclusion of the additional 1,000 miles authorized for the Interstate System under the 1956 Act. The cost estimates used as the basis for the apportionment of Interstate funds will, for the first time, include the financing of the 1,000 mile addition, beginning with the fiscal year 1963.

Under no conditions can Federal Aid funds be used for anything except the construction of highways. The maintenance of Federal Aid highways is excluded from participation in Federal grants in aid. After construction, the cost of maintenance of the highway is borne 100% by the State.

Because the Federal Aid Secondary System was devised by the Congress to bring form, mine and other natural resource products to the main Federal Aid System or to marketing and distribution centers, it is required that the County Commissioners of a county in which a proposed Federal Aid Secondary road lies, must concur with the State regarding its necessity before it may be submitted to the Federal Government for approval. The Colorado law is unique in requiring that the Boards of County Commissioners must concur with the State Highway Commission before a Federal Aid Secondary highway can be abandoned.

THE DEPARTMENT'S FINANCIAL CONDITION

The people of Colorado pay large sums of money in taxes and fees for their use of Colorado's system of highways. It is therefore the obligation of the Department of Highways to use sound management and accounting practices. This dictates that the monies collected should be expended in adherence to the best of budgetary procedures.

The records of the Department of Highways are kept on business machines in conformity with modern practice. Fiscal statements are prepared each month so that the management of the Department has always before it a current statement of its financial condition.

In addition to the fiscal statement, cost records are maintained for all of the different activities of the Department.

At the end of the calendar year and each fiscal year, a consolidated financial statement is prepared which can then be used to compare the current position with any previous period. On the facing page will be found the financial statement for the calendar year ending December 31, 1960. Attention is directed to the item of an Equipment Depreciation Reserve which is shown in the disbursement section as a credit. It is a Department practice to charge each operating division for the use of each piece of equipment which is assigned to it. The charge per day is based on a normal depreciation charge for the item of equipment. The operating budget of the division is charged each month for all pieces of equipment which are being used by that unit of the Department of High-

ways. The amounts collected from these charges are put in an Equipment Depreciation Reserve Fund which is used to replace worn-out equipment and to purchase any necessary new equipment. For the stated reason, the fiscal budget of the Department does not include an appropriation for the purchase of equipment, but the cost records always indicate the amounts which have been expended for that purpose. For this reason, the amount accumulated in the Reserve Fund is shown as a credit under the general heading of Disbursements.

In a manner similar to that used to charge operating divisions for their equipment, charges are made for office rental which is on a monthly basis to liquidate the bond charges on the Department building.

The Revolving Fund shown in the balance section of the report is a statutory amount provided by law to be used under the direction and authority of the Chief Engineer to make immediate cash payments to temporary labor or in other instances where an immediate expenditure of cash would be advantageous to the work of the Department. All expenditures from this fund are, like other expenditures of the Department, subject to review by the State Auditor and the State Controller.

Attention is directed to the amount shown as a disbursement for the amortization of anticipation warrants. This figure will reach a maximum of \$3,397,075 in 1961, and will then decrease until the last payment is made in 1975.

COLORADO DEPARTMENT OF HIGHWAYS
FINANCIAL STATEMENT — TWELVE MONTHS ENDING DECEMBER 31, 1960

BALANCES—December 31, 1959:

State Treasurer—\$8,243,054.38 Plus Investments \$1,287,665.56	\$ 9,530,719.94

Total Balances	\$ 4,304,436.26
Total Balances and Expenditures	\$69,449,966.84

THE DEPARTMENT'S INCOME

The income of the Department in the calendar year 1960, amounted to \$59,894,246.90. The statement was made under "The Department's Financial Condition" that large sums of money were paid by Colorado taxpayers for highway use. Nearly \$60 million in income is certainly a large sum of money. Part of the proper management of these funds is to continually develop improvements in programming based on anticipated future income as well as present revenue. In the operation of the Department of Highways, the historical trend of income for prior years becomes the basis for determining the size of highway programs of the future. The amounts of money that will be available for construction and maintenance activity are estimated in the same fashion.

On the facing page is an illustration which indicates the various sources from which the Department of Highways receives its income. It is pointed out that Federal Aid monies paid into the Federal Treasury in the form of gas tax and other taxes levied against the road users are sent back to the states to pay for the Federal Aid program. Not all the monies paid in by users are returned because a substantial amount is consumed in the other general functions of the Federal government. During 1960, 48.28% of our income was accounted for by those monies which were returned to the State in the form of Federal Aid.

All highway user taxes in Colorado levied by the State must be used for road purposes. The Department of Highways received 50.03% of all its income from the portion of the Highway User Tax Fund assigned to it by the State. The miscellaneous receipts of 1.69% came from Motor Vehicle fines, county funds and the other sources as shown on the facing page.

The three types of taxes or licenses which make up the Highway User Tax Allocation are Motor Fuel, Motor Vehicle and Motor Carrier. Allocations are made from the combined revenues less charges for Administration and the operation of the State Patrol. The amounts shown under Highway User Tax on the facing page for the three sources have been estimated in order to show approximate ratios of these sources for the amount used by the Department of Highways.

THE DEPARTMENT'S DISBURSEMENTS

The Department is proud of the high percentage of available funds which are used for the construction of new and better highways.

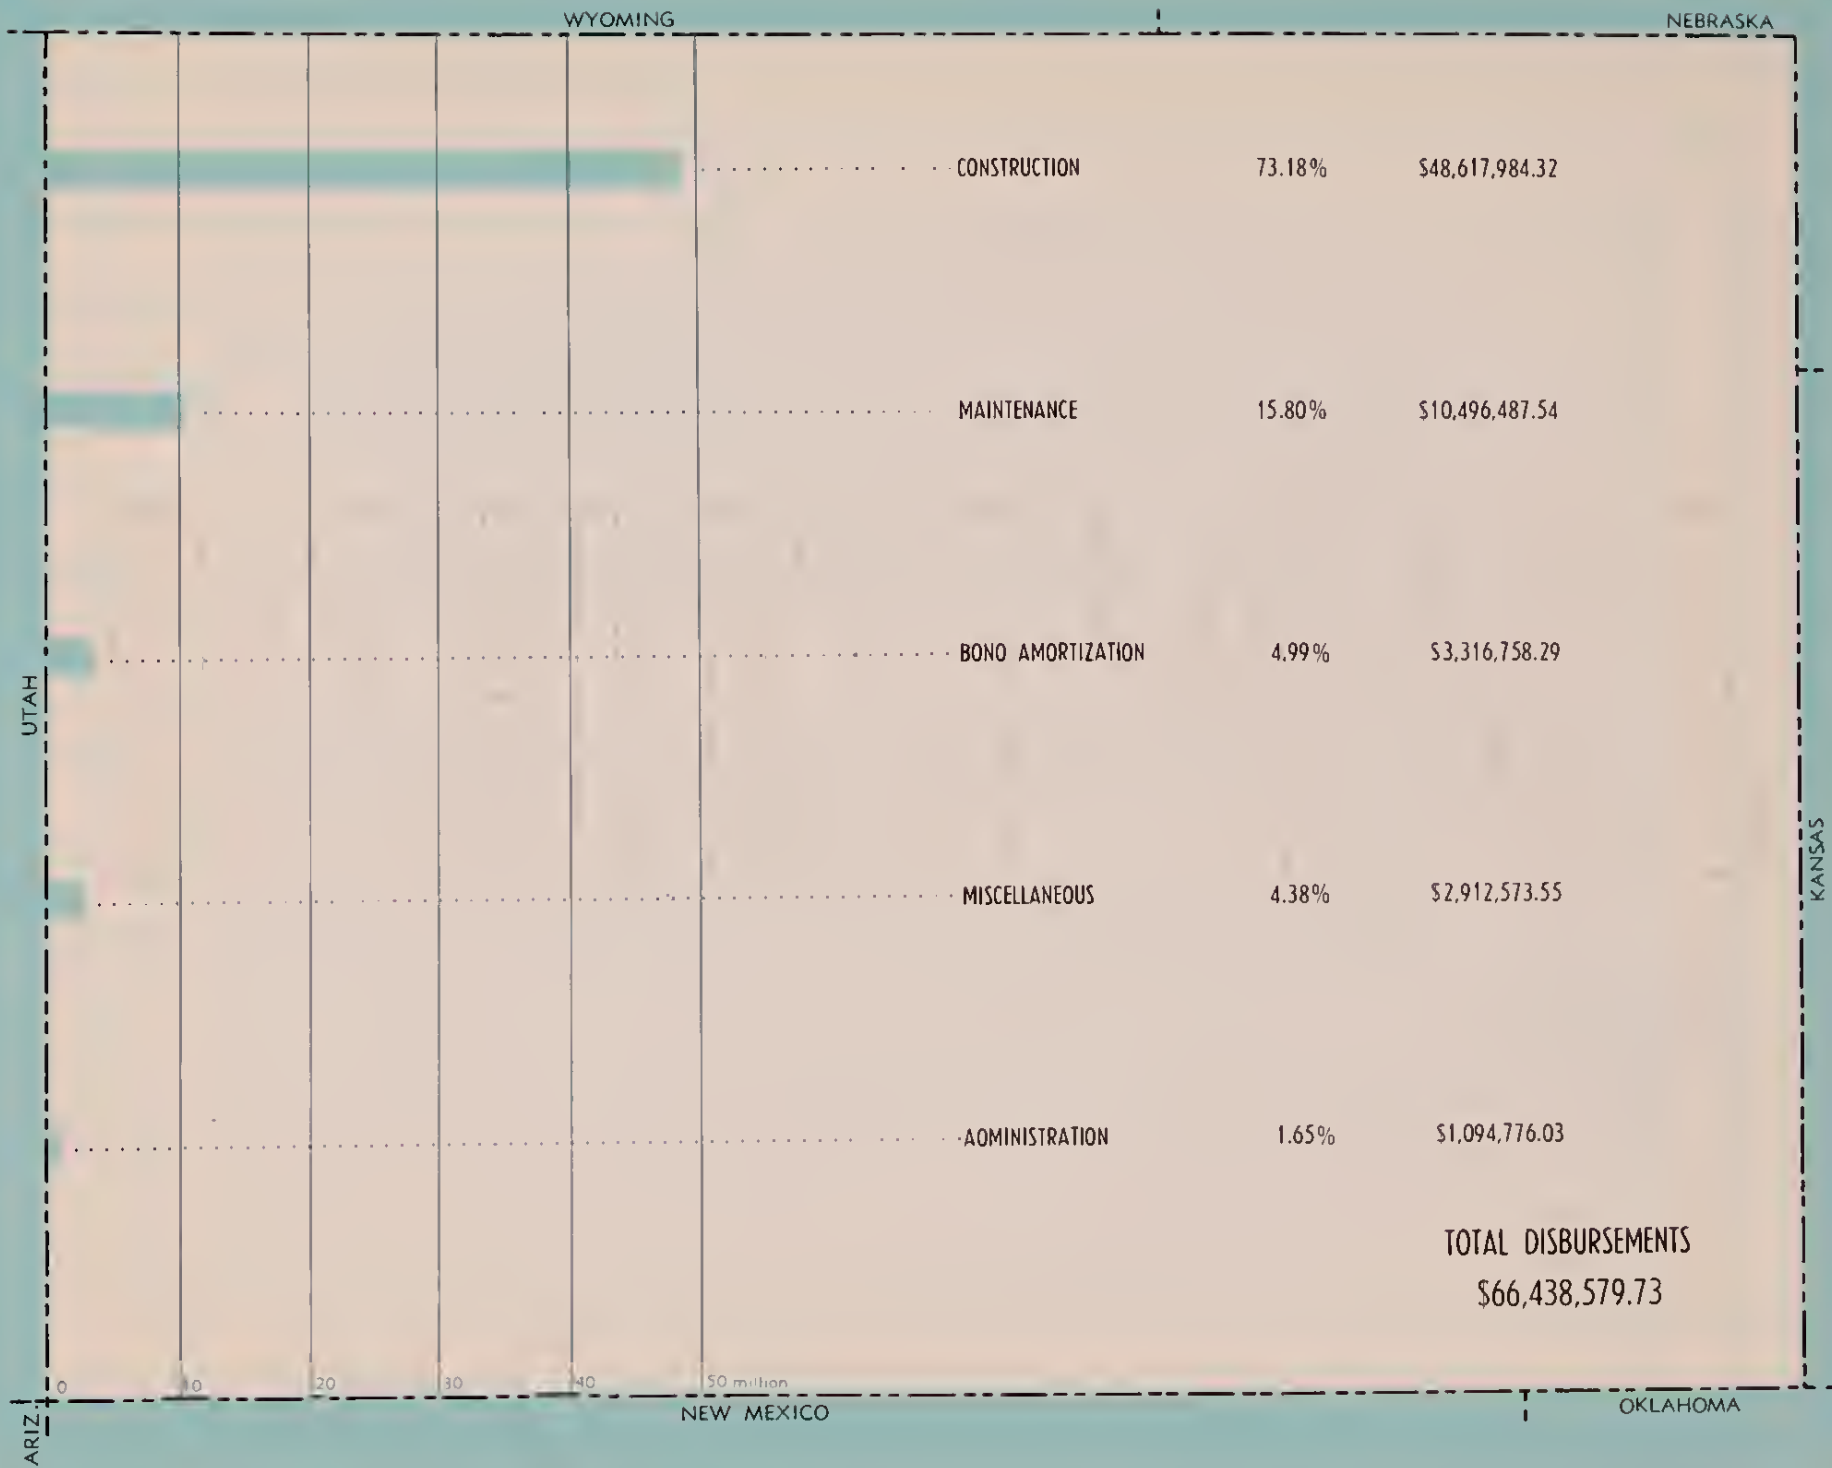

In order to establish proper programs for construction, maintenance and non-construction expenditures adequate data, both prior and current, must be available to the administrator.

Not including the credit amount for Equipment Depreciation Reserve, the total disbursements for the calendar year 1960, amounted to \$66,438,579.73. Of this amount 73.18% was expended for construction and 15.80% for maintenance of the highway system. 4.99% of the disbursements went to make interest and redemption payments on the \$35 million anticipation warrants issued during the period 1956 through 1959.

Although the statutes of the State permit a 5% expenditure for administration, the administrative cost of the Department was 1.65% for the calendar year 1960.

The miscellaneous disbursements were 4.38% and include charges for such as Planning and Research Division, Office Operations (reported as Engineering previously), State Employees Retirement Fund and other miscellaneous disbursements as shown in the financial statement in a previous page of this report.

The illustration on the facing page depicts the exact amounts of disbursement by major purpose.

THE CONSTRUCTION PROGRAM—1960

As shown under disbursements, the largest part of the highway dollar was spent for construction in 1960. It is difficult to visualize the amount of work that is accomplished by the expenditure of such large sums of money. The table shown below indicates the accomplishment in miles of roads that were built through the expenditure of the amounts of money disbursed for construction items. Briefly described, the mileage of 2-lane highways constructed during the year approximates the distance from Denver to Topeka, Kansas or Omaha, Nebraska. The mileage of 4-lane roads completed during the period would, in a similar manner, approximate the distance from Denver to Laveland. The two miles of 6-lane highways shown is a nominal distance, but is an indication of the type of facility built to handle high volumes of traffic efficiently. The accompanying illustration shows the graphic presentation of these facts.

THE MAINTENANCE PROGRAM—1960

In 1960, the State Highway System was composed of 8,716 miles of highways. Under the law, the State Department of Highways is responsible for the maintenance of each mile of its system, regardless of whether it is located in a rural area or within the incorporated limits of a city or town. The law permits the Department of Highways to contract maintenance to the other public agencies in the State if, by such contract, the public interest is served.

During 1960, 96.25% of all maintenance work on State highways was performed by the State. 2.34% was contracted to counties in the form of maintenance on Federal Aid Secondary highways and State highways without Federal status. 1.40% was performed for the State by cities. 0.01% was done for Other Agencies and will be reimbursed to the Department.

Taking the total work performed by State forces and using the cost records of the Administrative Division of the Department, it is possible to determine the amounts of money that are spent for the various kinds of maintenance work performed. On the facing page illustration, for example, is indicated the fact that about 36% of the total expenditure was consumed in maintaining road surfaces and proper drainage. About 25% was used for supervision and operation of equipment. Of interest to all is the fact that approximately 13% of the maintenance expenditure is used to remove snow and ice and to sand highways during storm periods. The placement of traffic signs and the now indispensable highway stripes accounted for an expenditure of about 10% of the total.

The total maintenance expenditure of \$10,496,487.54, less work for others, divided by the 8,716 miles of State highways indicates that the maintenance expenditures in 1960 resulted in an annual cost of maintenance of \$1,204.21 per mile. This figure converts to \$3.30 per mile per day.

THE CONDITION OF THE STATE HIGHWAY SYSTEM

The condition of the physical plant of any industry changes from year to year. The older parts of the plant have to be replaced or they become excessively expensive to maintain. As a means of determining the physical condition of the State Highway System to perform the job of handling traffic, an annual sufficiency rating is conducted. This sufficiency rating takes into consideration the ability of the highway to handle the existing traffic volume. Another aspect of the sufficiency rating is the measurement of the structural condition of the pavement and its foundation and drainage. Numerical ratings are obtained which are an index of just how good or bad the highway is at the present time. The resulting ratings are a valuable tool used in determining the highway sections which should be given priority in the construction program.

In 1960, 2,121 miles were rated as excellent and 1,757 miles were rated as critical. The balance of the system was rated as either good, fair or unsatisfactory. The illustration accompanying this text gives the detailed mileages in the various rating categories.

No ratings are made at present on the city sections of the State Highway System. The Department is in the process of developing a method of rating the city segments of the State Highway System.

THE DENVER-BOULDER TURNPIKE

The Denver-Boulder Turnpike has been a financial success from the time it was opened on January 21, 1952. Of the total revenue bonds sold to finance its construction, \$2,190,000 have been retired to September 1, 1961. In addition to the \$135,000 in bonds due September 1, the balance of \$520,000 due 1980, \$360,000 due 1979 and \$20,000 of the amount due 1978 were called for redemption September 1, 1961. This rate of retirement has been accomplished because the use given the road has been in excess of the original estimates made prior to construction.

During the period January 21, 1952 through August 31, 1961, a total of 21,914,044 passenger cars and 529,386 trucks had paid a net of \$5,022,669.85 for the use of this limited access highway. At the beginning of the fiscal period September 1, 1961, there was available in cash and in securities \$1,764,193.09 for the use either in the repayment of bonds, or interest, or for the operating necessities of the Turnpike.

COLORADO'S COUNTY ROAD SYSTEMS

COLORADO'S COUNTY ROAD SYSTEMS

Chapter 120, of the Colorado Revised Statutes, 1953, enumerates the reports which are required to be made by the counties each year for the information of the State Legislature and designated officials. If reports are not made, the law requires the State Treasurer to withhold a portion of the allocation to the delinquent county. The same law requires the Department of Highways to report its income and disbursement in a man-

ner similar to that required of the counties, but in greater detail. Under the law, it also becomes the obligation of the State Department of Highways to compile all the county reports and to distribute the compilations to a designated group of State, County and City officials.

Other major reports required to be submitted under the law are shown below.

Type of Report	State Department Designated To Receive	Annual Due Date	Period Covered
Expenditures and Receipts	State Auditor	May 1	Previous calendar year
County Road Budgets	State Tax Commission	September 1	Next annual period
Road System Changes	Department of Highways	May 1	Previous calendar year

The year 1960 was the seventh year in which reports of county road system receipts and expenditures were received in the State Auditor's Office. In a minor number of cases, it was necessary to recontact a county to obtain the reports within the required dateline or to secure an interpretation of the submitted figures. Immediately following is a tabulation prepared from the individual reports of expenditures and revenues submitted to the State Auditor by the several counties of the State. No attempt has been made to interpret the reports, but footnotes at the end of the table indicate the peculiarities that exist in any figures which need explanation. In the appendix of this report is a table which shows the

mileages reported by counties as constituting the county road systems and other roads open to public travel.

The mileage figures have been consolidated with registration data from the Motor Vehicle Department and percentages for distribution used by the State Treasurer in distributing the Highway User Tax Fund.

Maps and records substantiating mileages shown in the table referred to are on file in the Planning and Research Division of the Department of Highways and, as a public record, are open to examination by any citizen. Information regarding registrations is available at the Department of Revenue.

COLORADO COUNTY ROADS RECEIPTS, DISBURSEMENTS AND BALANCES FOR THE CALENDAR YEAR 1960

(Source: Individual County Reports to the State Auditor)

FOOTNOTES—COUNTY FISCAL REPORT, 1960

* Balance changed from previous year's ending balance.

1. Includes forest service; mineral leasing act; Taylor grazing act and other unidentified receipts.
2. Includes highway user tax; specific ownership tax "A"; motor vehicle penalty assessments; gas tax refunds; receipts from Department of Highways; additional motor vehicle registration fees and other unidentified receipts.
3. Includes property tax; transfers from other funds and other unidentified receipts.
4. If receipts were unidentified, no note is shown.
5. If disbursements were unidentified, no note is shown.
6. Accounts receivable.
7. Accounts payable.

8. Transfer to other funds.
9. \$34,764.77 accounts payable; \$2,514.50 unidentified disbursements.
10. Warrants outstanding.
11. Payments to State Department of Highways.
12. Receipts from Cities for operations performed by County.
13. \$20,653.00 unidentified disbursements; \$10,463.00 transfers to other funds.
14. \$6,350.00 accounts payable; \$75.50 transfers to other funds.
15. Disbursements for new shop buildings.
16. Interest on registered warrants.
17. \$30,728.09 unidentified disbursements; \$5,715.60 warrants outstanding.
18. \$3,580.00 unidentified disbursements; \$7.50 transfers to other funds.

COLORADO'S MUNICIPAL ROAD AND STREET SYSTEMS

COLORADO'S MUNICIPAL ROAD AND STREET SYSTEMS

Chapter 120, of the Colorado Revised Statutes, 1953, specifies requirements for incorporated places. These requirements are similar to those as stated previously for counties. In the same manner as provided for county reports, the State Department of Highways is required to compile the data obtained from municipalities and to distribute the consolidated information to the Legislature and other designated State and City officials.

On the following pages is tabulated the information obtained from the reports of municipalities as submitted to the State Auditor. The tabulation is augmented with footnotes explaining unique features of the reports of a number of the incorporated places. No attempt is made to interpret the information provided the Auditor by the reporting units.

In the appendix, there will be found the tabulation of mileages and registration data which result in the composite percentage used to distribute State user tax revenues to the various incorporated places.

The maps of the individual incorporated places which have been used in preparing this document are available for examination in the Planning and Research Division of the Department of Highways. In like manner, fiscal reports are retained in the files of the State Auditor and information on registration is available in the Motor Vehicle Division of the Department of Revenue.

COLORADO CITY STREETS RECEIPTS, DISBURSEMENTS AND BALANCES FOR THE CALENDAR YEAR 1960

(Source: Individual City Reports to the State Auditor)

FOOTNOTES—CITY FISCAL REPORT, 1960

- * Balance changed from previous year's ending balance.
- 1. Includes highway user tax; gas tax refunds; receipts from Department of Highways; additional motor vehicle registration fees and other unidentified receipts.
- 2. Includes property tax; general funds allocations and other unidentified receipts.
- 3. If entire amount was reported as specific ownership tax "B", no note is shown.
- 4. If disbursements were unidentified, no note is shown.
- 5. Includes \$1,655.00 to State Liquor Department; \$270.00 to Department of Employment.
- 6. Includes \$1,873.02 highway user tax transferred to Summit County for snow and ice removal.
- 7. Tax collection fees.
- 8. Accounts payable.
- 9. Includes \$1,200.00 net loan; \$1,044.46 specific ownership tax "B".
- 10. Interest and insurance on vehicles.
- 11. Includes \$2,908.75 from Arapahoe County; \$1,606.50 specific ownership tax "B".
- 12. Includes \$2,501.98 specific ownership tax "B"; \$1,956.15 accounts receivable.
- 13. Includes \$303,000.00 from special assessment districts for construction.
- 14. Includes \$2,435.09 specific ownership tax "B"; \$1,714.50 unidentified.
- 15. Includes \$215,000.00 from special assessment districts for construction.
- 16. Accounts receivable.
- 17. Paid to county for work done.
- 18. Includes \$747.00 specific ownership tax "B"; \$620.00 from county tax unidentified.
- 19. Includes \$4,957.90 specific ownership tax "B"; \$2,811.19 accounts receivable.
- 20. Non highway disbursements.
- 21. Includes \$1,267.20 specific ownership tax "B"; \$733.73 county tax for R.O.W. judgment.
- 22. No disbursements reported for calendar year.
- 23. Receipts unidentified.
- 24. Includes \$65,200.00 disbursements unidentified; \$1,052.64 accounts payable.
- 25. Disbursements for trash collection.
- 26. Disbursements for insurance.
- 27. Includes \$280,000.00 from special assessment districts for construction.
- 28. Includes \$270,000.00 from General Improvement Districts Bonds for construction.

"House".....	20,510
"Other".....	52,717
Total	73,227

DATA CONCERNING FEDERAL AID

APPORTIONMENTS TO STATES OF THE VARIOUS FUNDS CURRENTLY AVAILABLE FOR HIGHWAY
CONSTRUCTION ARE BASED ON THE FOLLOWING FACTORS:

Road System	Factors
Federal Aid-Interstate	100%—Ratio which the estimated completion cost of each State's system bears to the estimated completion cost of the system in all States.
Federal Aid-Primary	100%—1/3 Area, 1/3 Population, 1/3 Post Road Mileage.
Federal Aid-Secondary	100%—1/3 Area, 1/3 Rural Population, 1/3 Post Road Mileage.
Federal Aid-Urban	100%—Population of Cities over 5,000.

Total Amounts Apportioned and Colorado's Share of the Several Funds

Road System	Fiscal Year—1962 (July, 1961—June, 1962)		Fiscal Year—1963 (July, 1962—June, 1963)		Fiscal Year—1964 (Estimated) (July, 1963—June, 1964)	
	U. S. Total	Colorado's Share	U. S. Total	Colorado's Share	U. S. Total	Colorado's Share
Federal Aid-Interstate	\$2,178,000,000	\$ 16,783,594	\$2,370,000,000	\$ 31,734,300	\$2,567,500,000	\$ 34,378,825
